

A person's hands are shown holding the FIFA World Cup trophy. The trophy is a golden cup with a green and gold band around its base. The person's arms are visible, and a tattoo is visible on the left forearm. The background is a light blue gradient with a large, semi-transparent white circle on the right side. There are three small black squares: one in the top right corner, one in the bottom left corner, and one in the bottom right corner.

ANALYZING WORLD CUP DATA

OVERVIEW

This data analysis project aims to explore a dataset of international football matches from 1872 to 2022. The goal is to uncover insights about various aspects of international football, including:

- Identifying dominant teams and eras
- Analyzing trends in goals scored and home advantage
- Examining team performance based on playing location (home vs. neutral)
- Investigating the relationship between World Cup hosting and winning

GOALS

01

Understand historical trends in international football through data visualization and exploration.

02

Identify the most successful teams and countries based on goal scoring and winning records.

03

Analyze the impact of playing location (home vs. neutral) on team performance.

04

Investigate if hosting a World Cup provides an advantage for the host nation.

05

Explore the performance of teams from different continents in the World Cup.

DATASET & SOURCE

The dataset consists of three CSV files:

- **results.csv:** Contains details of each match, including date, teams, scores, tournament, location, and neutral venue indicator.
- **shootouts.csv:** Details penalty shootout results (not used in this analysis).
- **winners.csv:** Lists World Cup winners by year and hosting country (with manual correction for 2018).

The data source is a compilation from various sources like Wikipedia, RSSSF.com, and individual football association websites.

DATA FINDINGS

01

The code explores the FIFA World Cup data within the **results.csv** file.

02

Functions are used to identify matches with the highest goal difference, most total goals, and top goal-scoring countries.

03

A choropleth map visualizes the total goals scored by each country.

04

Analysis of the **winners.csv** data reveals:

- Teams with the most World Cup wins.
 - Success rates of South American and European teams based on hosting continent.
- 

OUTPUTS

- Who is the greatest football team of all time?
 - Which teams dominated different eras in football history?
 - What trends have emerged in international football over the years, such as home advantage, total goals scored, and team strength distribution?
 - Can we glean insights about geopolitics from football fixtures, such as changes in the number of participating countries or team rivalries?
 - Which countries host the most matches without participating themselves?
 - How does hosting a major tournament affect a country's chances in that tournament?
 - Which teams frequently play friendlies and friendly tournaments, and does this benefit or hinder them?
- 

OUTPUTS

- **Who is the greatest football team of all time?**

- While the provided data and analysis offer valuable insights into the history of international football, definitively crowning the "greatest football team of all time" is subjective and often sparks passionate debates among fans. However, we can leverage the data to identify dominant teams in different eras and explore broader trends in the sport.

- **Which teams dominated different eras in football history?**

- **1950s and 1960s:** Brazil emerged as a dominant force, winning the World Cup in 1958 and 1962. Their attacking flair and legendary players like Pelé defined an era.
- **1970s and 1980s:** The Netherlands, with their "Total Football" philosophy, and West Germany, with their disciplined and efficient style, were among the top teams.
- **1990s:** Germany, Italy, and Brazil continued their dominance, winning multiple World Cups and European Championships.
- **2000s:** Brazil and France were consistently strong, winning World Cups and European Championships.
- **2010s:** Spain, with their possession-based style, and Germany, with their tactical discipline, were dominant forces.

OUTPUTS

- **What trends have emerged in international football over the years, such as home advantage, total goals scored, and team strength distribution?**
 - **Home Advantage:** Historically, home teams have had a significant advantage, winning a higher proportion of matches. However, the advantage has decreased in recent years due to increased travel and more balanced playing fields.
 - **Total Goals Scored:** The overall trend in international football has been towards lower-scoring matches, particularly in recent decades. This can be attributed to defensive tactics, increased physicality, and more cautious approaches.
 - **Team Strength Distribution:** The gap between top-tier teams and weaker nations has narrowed over time. This is due to improved coaching, increased investment in youth development, and globalization of the sport.
- **Can we glean insights about geopolitics from football fixtures, such as changes in the number of participating countries or team rivalries?**
 - **Political Changes:** The dissolution of the Soviet Union and the breakup of Yugoslavia led to the emergence of new national teams and altered the geopolitical landscape of football.
 - **Team Rivalries:** Historical rivalries between countries, often rooted in political or cultural differences, have fueled intense matches and passionate fan bases. ■

OUTPUTS

- **Which countries host the most matches without participating themselves?**
 - While the data doesn't explicitly list countries hosting the most matches without participating, we can infer that major footballing nations like England, Germany, and France often host numerous international friendlies and tournaments.
- **How does hosting a major tournament affect a country's chances in that tournament?**
 - Hosting a major tournament can provide a significant boost to a country's footballing infrastructure and national pride. It can also lead to increased investment in youth development and improved facilities. However, the impact on a host nation's performance in the tournament itself is mixed. Some host nations have enjoyed success, while others have underperformed.
- **Which teams frequently play friendlies and friendly tournaments, and does this benefit or hinder them?**
 - Friendly matches serve various purposes, including building team cohesion, testing new tactics, and providing opportunities for younger players. While they can be beneficial, excessive friendly schedules can disrupt the rhythm of top teams and potentially lead to fatigue. ■

THE NUMBER OF MATCHES FOR EACH TOURNAMENT

tournament	num_matches
Friendly	17427
FIFA World Cup qualification	7774
UEFA Euro qualification	2593
African Cup of Nations qualification	1932
FIFA World Cup	900
...	...
AFF Championship qualification	2
TIFOCO Tournament	1
FIFA 75th Anniversary Cup	1
Copa Confraternidad	1
Real Madrid 75th Anniversary Cup	1

The matches cover various events, including the FIFA World Cup, FIFI Wild Cup, and regular friendly matches. It strictly contains men's full international matches and excludes Olympic Games or matches involving B-teams, U-23 teams, or league select teams.

The Number Matches in Each World Cup

year	num_matches
2018	64
2014	64
2010	64
2006	64
2002	64
1998	64
1982	52
1994	52

Analyze South American wins

- South American teams won 9 world cups in total
- 4 of these were won in South America
- 5 of these were won elsewhere
- 4/5 of South America hosted world cups were won by South American teams.

Analyze European wins

- European teams won 12 world cups in total
- 10 of these were won in Europe
- 2 of these were won elsewhere
- 10/11 of Europe hosted world cups were won by European teams.

INSIGHTS

01.

Football fans

Understanding historical dominance of teams and eras in international football.

02.

Analysts

Identifying trends in goal scoring, home advantage, and team performance based on location.

03.

National teams

Evaluating the potential benefits and drawbacks of hosting major tournaments.
